About

Hi, I'm Bryson. I love building creative web applications, focusing on intuitive user experiences and scalable back-end systems. I'm passionate about AI-powered solutions and developing innovative products that create value for users. As a recent graduate, I'm seeking a full-time web development role where I can contribute, collaborate, and grow as part of a team.

Stack

- JavaScript
- TypeScript
- React
- Node.js
- Express
- DynamoDB
- MongoDB
- AWS

Projects

CheapChat – Multi-AI chat platform

A pay-as-you-go chatbot platform giving users access to premium LLMs without recurring fees. Currently supports OpenAI + Perplexity

React • Vike • AWS • Cognito • Stripe • Lambda Layers • DynamoDB

PyFiddle – Run and share Python snippets

An online IDE for writing, executing and sharing Python code with automatic URL generation for easy access and collaboration

React • Pyodide • GitHub API • Docker • Amazon ECR • MongoDB

n* Namescraper – AI domain search

Leverages OpenAI and GoDaddy APIs to generate and check domain name availability in bulk, based on user business descriptions

React • OpenAI API • GoDaddy API • WebSocket API • AWS • MongoDB

...more

Certificates

- AI-900: Azure ↗
- DP-900: Azure ↗
- Databases: ITS ↗
- JavaScript: ITS ↗
